

WHY US

Environmental challenges are often complex — limited site data, fragmented information, regulatory requirements and impractical solutions can make environmental decision-making difficult.

We bridge this gap through field investigation, scientific analysis, GIS & remote sensing, and practical engineering solutions to deliver clear insights and sustainable outcomes.

OUR EXPERTISE

- Environmental Engineering
- GIS, Remote Sensing & Mapping
- Environmental Impact Assessment (EIA)
- Environmental Clearance (EC) Support
- Water Quality Assessment & Reporting
- Wastewater Treatment & Reactor Design
- Environmental Site Investigation
- CADD & Technical Design

STRATEGIES FOR A SUSTAINABLE TOMORROW

Expertise You Can Trust.

Engineering Backed by Evidence.

From understanding the environment to designing sustainable solutions.

**Understand better. Decide smarter.
Sustain responsibly.**

GEOSUSTARA ENVIRO SERVICES LLP

Bridging environmental responsibility with practical implementation

"To be a premier catalyst for sustainable development, harmonizing industrial progress with environmental integrity."

OUR CORE SERVICES

1. Environmental Compliance & Consulting
 - Regulatory approvals and compliance support
 - Audits, reporting, and baseline monitoring
2. GIS & Geospatial Services
 - Thematic mapping and spatial modelling
 - LULC, watershed, and sensitivity analysis
3. Pollution Control & Management
 - Pollution control and system maintenance
 - Water, wastewater and solid waste management
4. Sustainability & Eco Solutions
 - Sustainability planning for projects
5. Training & Research Support
 - Industry training and capacity-building
 - Academic research and project guidance

GEOSUSTARA ENVIRO SERVICES LLP

EIA & Compliance

- Preparation of comprehensive Environmental Impact Assessment (EIA) reports
- Site investigation reports for EIA and Environmental Clearance (EC) related works

Environmental Analysis & Spatial Solutions

- Water quality analysis and testing
- GIS-related mapping, spatial analysis, and consultancy works

Water, Wastewater and Solid Waste Management

- Design and implementation of sewage treatment plants
- Solid waste treatment facilities
- Water treatment systems for swimming pools and related recreational water bodies

Academic & Research Support

- Professional academic coaching for GIS applications and software
- Comprehensive guidance and assistance for academic projects

WHO WE SERVE

Industries & Manufacturing

Environmental assessments, compliance and management solutions.

Hotels & Commercial Establishments

Water, wastewater and environmental solutions.

Quarries & Mineral-Based Industries

Site assessment, mapping and environmental studies.

Government Agencies & Local Bodies

Environmental studies, mapping and technical support.

Students & Academic Institutions

Environmental analysis, GIS, mapping and technical assistance.
